New Format Icons and Facets coming Thursday, 2/7

Added by **Tara Wood** (02/01/2019 - 13:00) , last updated by **Tara Wood** (02/07/2019 - 10:55)

Our [most recent usability test](#) revealed two issues with our catalog around downloadable formats.

First, patrons expected to see facets for e-materials in the Format facet, which currently just includes physical item formats.

Second, it wasn't always clear what items are downloadable and what items are physical in a skim of search results. This was confusing for both patrons who prefer to check out physical materials and patrons who prefer downloadables.

To address these issues, we are making some changes to the catalog, which you will see **Thursday, February 7th**.

We are adding the following facets to the Format facet in Enterprise:

- eBook
- eAudiobook
- eVideo
- eMusic

In addition, you will see new icons for formats, including these icons for downloadable materials:

-  eBook
-  eAudiobook
-  eMusic
-  eVideo

We think these changes will benefit you and your patrons, and we're excited to do some follow up testing to see how they affect the findability of item formats. [Take a look at the new icons and facets](#) on this test version of the catalog.
