> hit download

↳ (if not already logged in to enterprise)

Login

id

pin/pw

↳ holds

→ this item not available
you are on the waitlist

↳ available

do you want to read/listen
in your browser ○

or on the mobile app ○
(have to be on the device)

→ browser takes you to website
and logs in w/ info saved in browser

→ (ideal) - recognize which vendor
from info from record

if vendor ~~and~~ ^{account} still
needs to be setup
should take you
into form.

→ may still need to ask @ file type
→ pdf/ade → open ^{viewer} helper app
etc

→ kindle → amazon acct:

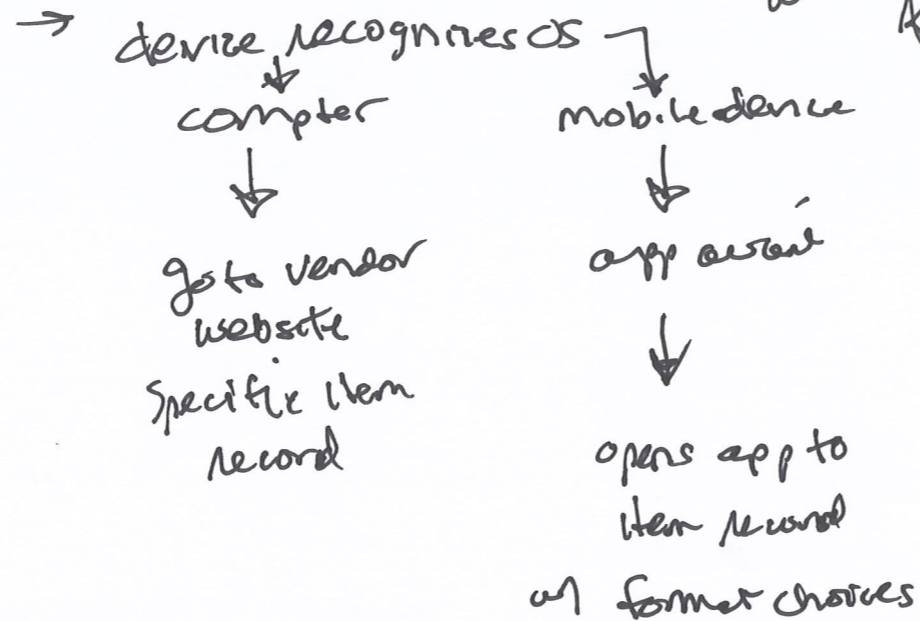

(detect OS so uses
that info to offer prompts)
(don't do cko in enterprise
take you out to vendor website
mobile)

app/website not on tablet - based on app
 ... business may want app

Sketching: eBooks & eAudiobooks in Enterprise

Login → **holds** → placed on wishlist

→ **download**

and recognizes vendor from item record

throw to app store if not there yet.

→ Login to vendor account — or create vendor acct
 → ideal would be that login on enterprise authenticates for vendor too
