

SWAN RFID Users meeting.

November 2nd, 2023

Dustin Lamm
SRBDE Central US
FE Technologies

Introducing FE Technologies

FE Australia – A global leader in RFID Solutions for Libraries since 2006

FE USA – Opened in the US in 2019 rapidly growing to over 125 Library Systems with over 470 unique installations.

FE Technologies - Innovative Product Line – V5/V6 – Lockers – ATL – AMH and more!

Most User-Friendly Software – Envoy, Sort Assist, Cloud Solutions

Committed to Support and it Shows

What customers are saying

“ We chose FE Technologies because they provide the very best user experience!”

**Glenview
Public Library**

Raising the Bar for Support to Libraries is our passion!

“working with FE’s support team has been head and shoulders **above** what I expect from library vendors, and **well above what we get from most of the other companies I work with in my position.** It’s been such a **pleasant surprise.** I know some of these things seem small, but for me and my team, the time we lose to poor vendor communication adds up to hours every week. We’re going to be **able to do more** and **get things done more quickly** because FE support is **so effective.**” – Irving Public Library
