Why on earth do
books come
faster in Aspen
than Workflows
holds

why can't items
stay in the search
bar when you
enter masquerade
mode?

dvd/blue ray
combo display
confusing
patrons (and
some staff also)

search results
clearing when
you enter
masquerade
mode

Ability to adjust
guidelines for record
grouping (i.e. keeping
abridged version out of
grouping or The Night
Before Christmas picture
books grouped by
illustrator)

why is pride and
prejudice the first
result in so many of
my very unrelated
searches?

needing to re-
search after
entering
masquerade

Better record
display for movie
variations (DVD v.
Blu-ray v. 4K v.
Combo)

Search rankings
seem off
sometimes
(keyword vs. title
searches)

keyword search
for exact title
ends up low in
search results

search
results
weighting
still odd

stay on the
same screen
when entering
masquerade
mode

A report for items
without cover images
(is this available and I
forgot? I feel like this
has been discussed
before...)

Better
database
integration
into Aspen
