can use lists

still has scannable barcode

similar to browser Aspen

Mirrors Aspen in appearance function

The more section is cool

I like how it shows the formats of each item when you search before you click into them.
👍 1

system messages

displays holds info similar to the old SWAN app

easy to see what is ready for holds pickup

patron barcode is easier to find for scanning, etc.

grouped records
👍 1

grouped records

Available now feature

Browse categories

Great picture view on home page - clear icons

can see browse categories

Browse categories

new this week lists (browse categories) are prominent

optional notifications
👍 1

light/dark mode toggle
👍

customize browse category view

Title view with format filter/select buttons

Camera search works for ISBN and barcode
👍 1

feels more user-friendly/intuitive to use

Account setup is intuitive

doesn't scroll to top when clicking at top of screen

Start up loading flavor text diversity (I'm sure there are more library facts to share)

SAME INFO TIDBITS every time while app is loading

does not allow you to go into browse categories beyond first one

👍 1

List ebook holds separate than print book/item holds

same fact on loading screen every time

miss the links to other nearby SWAN Libraries

lack of detailed bibliographic data

👍 1

correct logo showing with library card barcode

long app loading time

👍 3

difficult to start another search after first; have to go back to start page with browse cat. loading

👍 5

In portrait view, under browse management; text does not wrap the category names, thus cutting off the category names. Maybe text wrap? -CSD, Anjali

long loading time, some lag in responsiveness? (or maybe it is just my phone)

more bibliographic information without clicking on "Show Editions"?

👍 1

lists aren't loading; doesn't show that it saved when you've created a list

seems to have consistent trouble loading cover images

👍 1

Hitting load all categories under "Discover" never loads anything

Customize browse search more (I want more than New York Times Best Seller options) (Can I create my own?) - CSD, Anjali
